

FOR IMMEDIATE RELEASE

## e-ImageData to Debut Latest Product Innovation at ALA Conference

The AUTO-Fiche Carrier™ is moving microfiche research into the digital age

Hartford, Wis, June 8, 2017— e-ImageData, the world industry leader in innovative micrographic film equipment, will debut the newest cutting-edge addition to the best-selling ScanPro product line, the AUTO-Fiche Carrier, at ALA in Chicago, Ill, June 22-27, booth #5011. This latest product innovation is moving microfiche research into the digital age with patented pending technology that allows for “hands-free” and hassle-free research.

Never before seen in the micrographics industry, the AUTO-Fiche Carrier eliminates the manual work of moving the fiche carrier to find your desired image. The AUTO-Fiche Carrier is operated entirely by on-screen controls to perform all operations, allowing users to move directly through their fiche image-by-image, anywhere on the fiche, with a single click. In addition, the AUTO-Fiche Carrier can automatically scan a range of images or the entire fiche, seamlessly and with unparalleled accuracy.

“Research using microfiche has long been known to be cumbersome and quite frustrating. We felt there was a need in the marketplace for a product that addresses these issues and makes working with microfiche easy and efficient,” says James Westoby, president, e-ImageData. “As leaders in the industry, we are excited to be able to bring our customers this latest innovation to advance their research.”

Small in size, the AUTO-Fiche Carrier is retrofittable, with the exception of the ScanPro 1000, to every ScanPro model. It provides constant focus, has easy-to-use controls and provides the same image clarity you’ve come to expect from the ScanPro line of products. The AUTO-Fiche Carrier is backed by our unmatched three-year factory warranty and supported by factory-trained and certified resellers.

To see how e-ImageData is moving your microfiche into the digital age, visit us at booth #5011 and enter our drawing to win a ScanPro 2200.
